**No. HPSPCB/ Noise Pollution Data (RO's)/94/ (Vol-IV)/2020** 15992-93  
**Dated** 25/2/2024

**From:** The Member Secretary  
**To**

SA  
**The Asstt. Inspector General of Police**  
**Traffic Tourist & Railway & HP, Shimla.**

**Sub:** Regarding original application No.681/ 2018.  
**Sir,**

This is in reference to the subject cited above, I am directed to convey the ambient noise monitoring report of Himachal Pradesh for the year 2023 (copy enclosed) for different areas/ zones at selected locations in the State based on weekly monitoring conducted by the State Board during the year 2023 for kind information and further necessary action please.

Thanking You.

Yours sincerely  
 -Sd/-

**Dr. Manoj Chauhan**  
**Chief Scientific Officer**

**Encl.: As above.**

PCB - K001/3/2022 - DIS/479215/2024  
**Copy to:**

✓ The System Manager, IT, HPSPCB, Shimla to upload the ambient noise monitoring data/report for the year 2023 on the website of the State Board.

Signed by  
 Manoj Chauhan

**Report on findings of Noise monitoring conducted by HP State Pollution Control Board for the year, 2023**

The Himachal Pradesh State Pollution Control Board is regularly conducting ambient noise monitoring for different areas/zones at 87 selected locations in the State on a weekly basis, places where ambient noise has exceeded up to 5 times (day/night) during the year are not treated as hot spots from ambient noise pollution point of view. Further, it is evident from the Ambient noise level monitoring carried out by the State Board for the year, that the observed values are exceeding the prescribed standard, especially for silence zones in Shimla, Kullu, Manali and Rampur in day/night time and Shimla day time. In Shimla city, all the schools and hospitals show values above the standard prescribed limit in the silence zone. Region-wise report of Noise monitoring results exceeding the prescribed norms under ambient noise monitoring data is enclosed in Annexure-A:

➤ **Silence Zone**

**Standard Prescribed Limit in dB (A) for day time = 50 dB (A)**

**Standard Prescribed Limit in dB (A) for Night time = 40 dB (A)**

<b>Sr. No.</b>	<b>Areas where monitoring results are above the standard prescribed limit in the Silence zone</b>	<b>Total No. of values above the standard prescribed limits for day and night time.</b>
1	Shimla	21 values in the day time (conducted at Twenty-five silence zone locations).
2	Kullu	10 values in the day time & 40 values in the night time (conducted at one silence zone location).
3	Manali	11 values in the day time & 36 values in the night time (conducted at one silence zone location).
4	Rampur	29 values in the day time (conducted at four silence zone locations).

➤ **Residential Zone**

**Standard Prescribed Limit in dB (A) for daytime = 55 dB (A)**

**Standard Prescribed Limit in dB (A) for Nighttime = 45 dB (A)**

Ambient noise level monitoring was carried out by the State Board for the year 2023 for residential zones and it was found that the observed values are exceeding the prescribed standard in Kullu and Manali.

Sr. No.	Areas where monitoring results are above the standard prescribed limit in the Silence zone	Total No. of values above the standard prescribed limits for day & night time.
1	Kullu	06 values in the day time & 07 values in the night time (conducted at one residential zone location).
2	Manali	05 values in the day time and 32 values at the night time (conducted at one residential zone location).

➤ **Commercial Zone**

**Standard Prescribed Limit in dB (A) for day time = 65 dB (A)**

**Standard Prescribed Limit in dB (A) for Night time = 55 dB (A)**

Ambient noise level monitoring was carried out by the State Board for the year 2023 for the Commercial zone and it was found that the observed values exceeded the prescribed standard in Manali.

Sr. No.	Commercial Zone (Hot Spot) in HP as per Record of Ambient Noise monitoring for the year, 2023	Total No. of values above the standard prescribed limit For day Time=65dB(A) For Night Time=55 dB(A)
1	Manali	16 values in day time and 9 values in night time (conducted at one commercial zone location).

➤ **Industrial Zone**

**Standard Prescribed Limit in dB (A) for day time = 75 dB (A)**

**Standard Prescribed Limit in dB (A) for Night time = 70 dB (A)**

Ambient noise level monitoring was carried out by the State Board for the year 2023 for the Industrial zone and found all locations have values within the prescribed limit.

## Report on findings of Noise monitoring conducted by HP State Pollution Control Board for the year, 2022

The Himachal Pradesh State Pollution Control Board is regularly conducting ambient noise monitoring for different areas/zones at 87 selected locations in the State on weekly basis, places where ambient noise have exceeded up to 5 times (day/night) during the year are not treated as hot spots from ambient noise pollution point of view. Further, it is evident from the Ambient noise level monitoring carried out by the State Board for the year, that the observed values are exceeding the prescribed standard especially for silence zone in Shimla, Kullu, Manali Baddi & Nalagarh in day/night time and in Shimla day time. In Shimla city, all the schools, hospitals shows values above the standard prescribed limit in silence zone. Region wise report of Noise monitoring results exceeding the prescribed norms under ambient noise monitoring data is enclosed at Annexure-A:

### ➤ **Silence Zone**

**Standard Prescribed Limit in dB (A) for day time = 50 dB (A)**

**Standard Prescribed Limit in dB (A) for Night time = 40 dB (A)**

<b>Sr. No.</b>	<b>Areas where monitoring results are above the standard prescribed limit in Silence zone</b>	<b>Total No. of values above the standard prescribed limits for day &amp; night time.</b>
1	Shimla	18 values in day time (conducted at Twenty five silence zone locations).
2	Kullu	30 values in day time & 42 values in night time (conducted at one silence zone location).
3	Manali	08 values in day time & 42 values in night time (conducted at one silence zone locations).
4	Baddi	06 values in night time (conducted at one silence zone locations).
5	Nalagarh	06 values in night time (conducted at one silence zone locations).

### ➤ **Residential Zone**

**Standard Prescribed Limit in dB (A) for day time = 55 dB (A)**

**Standard Prescribed Limit in dB (A) for Night time = 45 dB (A)**

Ambient noise level monitoring carried out by the State Board for the year 2022 for residential zone and found that the observed values are exceeding the prescribed standard in Kullu and Manali.

<b>Sr. No.</b>	<b>Areas where monitoring results are above the standard prescribed limit in Silence zone</b>	<b>Total No. of values above the standard prescribed limits for day &amp; night time.</b>
1	Kullu	10 values in day time & 08 values in night time (conducted at one residential zone locations).
2	Manali	28 values in night time (conducted at one residential zone locations).

➤ **Commercial Zone**

**Standard Prescribed Limit in dB (A) for day time = 65 dB (A)**

**Standard Prescribed Limit in dB (A) for Night time = 55 dB (A)**

Ambient noise level monitoring carried out by the State Board for the year 2022 for Commercial zone and found that the observed values are exceeding the prescribed standard in Kullu, Manali and Dharamshala.

<b>Sr. No.</b>	<b>Commercial Zone (Hot Spot) in HP as per Record of Ambient Noise monitoring for the year, 2020</b>	<b>Total No. of values above the standard prescribed limit (2020) For day Time=65dB(A) For Night Time=55 dB(A)</b>
1	Kullu	08 values in day time (conducted at one commercial zone locations).
2	Manali	06 values in night time (conducted at one commercial zone locations).
3	Dharamshala	06 values in day time (conducted at one commercial zone locations).

➤ **Industrial Zone**

**Standard Prescribed Limit in dB (A) for day time = 75 dB (A)**

**Standard Prescribed Limit in dB (A) for Night time = 70 dB (A)**

Ambient noise level monitoring carries out by the State Board for the year 2022 for Industrial zone and found all locations have values within the prescribed limit.
